<b>Goals</b>	Learn the process of agile development	<b>Team contract signed by:</b>
	Have an enjoyable experience working together as a team	Momchil Petrov
	Fullfill the clients wants to the best of our ability	Eric Schneider
	Build something we can be proud of, something useful, maintainable and beautiful	Robert Balink
<b>Meeting norms</b>	Two daily-like meetings in a week (apart from the mandatory one on Thursday)	Todor Moskov
	Meetings are mandatory	Zlatina Metodieva
	Being late is not acceptable	
<b>Working norms</b>	Decisions will be made collectively	
	Give constructive criticism, but also be able to face criticism yourself	
	Everyone works independently or in pairs	
<b>Coordination norms</b>	Product Owner leads the team meetings	
	We allocate assignments together	
<b>Communication norms</b>	Every team member checks the WhatsApp Group at least once a day	
	Respond to a message within a work-day	
<b>Consideration norms</b>	Handle disagreements in direct discussions, involve the whole team if no solution was found.	
<b>Cont. improvement norms</b>	Track progress via Kanban board.	
	We evaluate the work of others based on the quality of the job done	
<b>Rewards</b>	Live team building as a reward	
<b>Sanctions</b>	Do a small workout routine (5 push-ups / 10 squats)

14	2022-02-10	Demo day / final release			Everyone else		
15	2022-02-17	Project retrospective due			Everyone else		

Product Vision	Project Mission
<p>The product is a Microsoft Teams tab, which provides a similar web interface to the pre-built Sharepoint functionality. The interface will handle the authentication of the users making sure that the connection between the two services (MS Teams and NextCloud) is secure and stable. The application aims to serve as a back-up, so that Microsoft Sharepoint is not a single point of failure. Additionally, it enables the user to use an open-source software solution for data management, which may be especially attractive for German clients, since NextCloud is developed in Germany. Our plugin aims to achieve transparency between a client and a service, so that the user knows how his data is handled - something that's missing in a closed source solution like Microsoft Sharepoint.</p>	<p>Using the Teams to NextCloud plugin will provide the user with an alternative to the already build in Sharepoint plugin for storing and managing data inside of Teams. Users will be able to upload, download, modify data that is stored in NextCloud from inside of Teams as this is a core functionality of data management software. Additionally, our plugin will enable the users to bind a shared folder to a specific channel, so that only the members of this channel will be able to see it and work on it.</p>
<p>The reason of existence of the envisioned product (beyond this project).</p>	<p>The mission of this particular project (in the context of the product vision).</p>
